

Cellona® Cream

Protective cream for skin that needs extra care. It is particularly suitable when the skin comes into contact with aqueous alkaline solutions or solutions containing surface-active agents, or with the use of substances which are insoluble in water, e.g. oils and dyes.

This oil-in-water emulsion contains ingredients to restore the oil balance of the skin; it can be easily and evenly spread and is rapidly absorbed. The cream contains a component which

creates a protective barrier against everyday environment influences. The skin is covered with an air-permeable protective film. Cellona Cream can also be used for full body care, even on sensitive skin.

Cellona® Cream

Ingredients:
(INCI)
Aqua (Water)
Glyceryl Stearate SE
Cetearyl Alcohol
Isopropyl Palmitate
Propylene Glycol
