

# Raucodrape®

NEW

## Safety and convenience for the OR team and the patient

### Innovations in the

#### Raucodrape® OR Drape System

The new generation of Raucodrape OR drapes focuses on improved materials, innovative service, and a higher level of safety.

#### Special benefits of the new Raucodrape®

- substantially improved material performance
- wider choice of sets and individual products
- user-friendly folding styles
- self-explanatory pictograms
- double set of documentation labels for each product

### The new materials

- are fully absorbent and impermeable to fluids
- meet the requirements of the high-performance standard in terms of EN 13795
- provide enhanced safety of use
- provide increased user convenience
- enable efficient infection prophylaxis in the OR setting
- show excellent draping behaviour

L&R uses the following names for improved materials and a systematically structured range of OR drapes:

#### Raucodrape®

a 2-layered material for surgical procedures involving a normal amount of fluids

#### Raucodrape® Plus

a 2-layered material with 2 reinforcing layers for use in procedures involving large amounts of fluids

#### Raucodrape® Drape Sheets

a 2-layered material for use in minor surgical procedures

Raucodrape® will continue to be available in a 3-layered version as well.

# Raucodrape®

## Standards defined by indications

From our new Raucodrape range, you choose the drapes that best suit your specific purposes. A large number of single-sheet drapes are available to provide convenient and handy all-in-one-solutions.

## Raucodrape® OR standard sets for specific operations

Easier storage and precious time saved in preparing surgical procedures are two strong arguments in favour of specific procedure sets. The Raucodrape product range includes a wide variety of OR standard sets for specific indications.

## Solutions for outpatient surgery

For the purposes of outpatient surgery, the L&R portfolio includes an expanded range of Raucodrape products with features tailored to the specific requirements involved.

The comprehensive range of 2-layered OR drapes meets the exacting requirements for convenience and safety. By using Raucodrape OR drapes, process flow can be optimised, and the cost-efficiency of outpatient surgical procedures can be increased.

## Kitpack® OR Custom Procedure Tray

Kitpacks include OR drapes as well as all single-use OR components you need for your particular type of surgical procedure. Our indication-specific, process-oriented Kitpacks are thoroughly assembled in accordance with your individual demands and preferences.

## Product tests

Product tests provide a sound and solid basis for decision making. L&R invites you to test Raucodrape OR drapes for yourself in a trial run under everyday conditions.

For details and specific enquiries, please feel free to contact our medical device consultants.

## Training courses

Topical product training courses are the starting point for the optimised process implementation of Raucodrape OR Drape Systems in your own routine practice. This is why we make it a top priority to provide thorough, systematic training for your OR staff.

You are kindly invited to take advantage of our training course programme. We are looking forward to telling you more about the special benefits and advantages of the Raucodrape OR Drape System.
