

tg® Ready-to-wear Dressings

These ready-to-wear dressings are ideal for covering body parts affected by dermatological disorders, e. g. contact dermatitis, photodermatitis and medically treated skin.

For such indications, ready-to-wear dressings are quick and easy to apply. The material used was selected for its excellent hypoallergenic characteristics.

tg® Glove

Soft, supple hand/finger dressing shaped for a comfortable fit. Also for preventing superinfections.

100% cotton, washable, sterilisable (A 121°C).

tg® Mitten

Thumbless hand dressing with integrated tie strings for securing at the wrist. As protective covering for dermatological disorders, and to prevent children with itchy skin conditions from scratching themselves.

100% cotton, washable, sterilisable (A 121°C).
