

# Curaderm® All-in-one Neurodermatitis Suit

Single-piece suit made from unbleached and undyed cotton for protecting infants and children with neurodermatitis, psoriasis and other itching diseases. Toes and fingernails are securely enclosed in the integrated socks and mittens whilst the elasticated band adjustable

by parents and carers prevents hands and feet from slipping out.

New skin defects are thus avoided, while itching is steadily reduced. Children are able to move freely and feel comfortable in this breathable all-in-one suit.

## Curaderm® All-in-one Neurodermatitis Suit

Made from 100% cotton, unbleached and undyed, zip fasteners and externally closable elastic draw strings have no skin contact; seams are on the outside; washable up to 95°C.
